

Created in the 1920's by Dr. Max Gerson, Gerson Therapy is the most effective all natural therapy ever created for restoring and maintaining good health, based on the principle that cancer and most chronic disease are caused by toxicity and deficiency within the body.

Everyone has a long list of chemicals and toxins running through their body and most people pay no attention because of the amazing filters and cleansing mechanisms that automatically scour their system day and night 24-7-365.

The younger a person is, the better these processes work. However, as we age our filters become less able to deal with a lifetime of overwork and improper maintenance leading to a toxic waste build up that poisons every system in the body. When the body eventually becomes overwhelmed and loses it's capacity to cope, it becomes a fertile environment for chronic disease.

We invite you to read on about the Gerson Therapy and see for yourself what it has done for tens of thousands who were literally on death's doorstep when they began the therapy and are alive today telling their stories in person.

For the skeptics who think there is no way this can work, we ask that you temporarily set aside your disbelief, just for a moment (you can always go back and get it later) and let us show you the whole story.
